

Read these instructions before using the product and retain for future information.

#### DT 45200

## ► Before Startup

When operating the signal converter, certain parts of the module can carry dangerous voltage! Ignoring the warnings can lead to serious injury and/or cause damage!

The signal converter should only be installed and put into operation by qualified staff. The staff must have studied the warnings in these operating instructions thoroughly.

The signal converter may not be put into operation if the housing is open.

In applications with high operating voltages sufficient distance and isolation as well as shock protection must be ensured.

Safe and trouble-free operation of this device can only be guaranteed if transport, storage and installation are carried out correctly and operation an maintenance are carried out with care.

Appropriate safety measures against electrostatic discharge (ESD) should be taken during range selection and assembly on the transmitter.

#### ▶ Short description

The configurable transmitter is designed for operating various Pt sensors. The measured values are converted temperature linear into a current or voltage signal.

The configuration can be done either via DIP switch or via an USB-interface with the PC configuration program DRAGOset. A wide variety of standard measuring ranges are available ready to use.

The 3-way isolation guarantees reliable decoupling of the sensor circuit from the processing circuit and prevents linked measurement circuits from influencing each other. The auxiliary power can be supplied via the connection terminals or type-specific via the optional In-Rail-Bus connector (see accessories).

## ► Configuration and startup

## Configuring with DIP switch

Use the DIP switches to configure the device, according to table.

#### Configuring with software DRAGOset

Use the software DRAGOset to configure the device. Changes to the configuration and parameterization data can be performed both during operation with a connected measuring circuit and in a disconnected state.

The DRAGOset software is available for download free of charge at: www.drago-automation.de

The device is equipped with a programming socket on the front. Use the DRAGOset USB Converter only for connecting the device to the PC (Order no.: DZU1201). To change the configuration and parameterization DIP switch S1-1, 2, 3 have to be set ON!

#### Commissioning Function

The Commissioning Function with a stepped keystone signal on output supports a fast and simple testing of cabling and connection of downstream devices or measuring adjustment. Press the function button located behind the front cover for longer than 3 seconds. The Commissioning Function will be indicated with a yellow LED (quick double off).

Output value:

Output	0 %	7	50 %	7	100 %	7	50%	K
Time	5 s	3 s	3 s	3 s	5 s	3 s	3 s	3 s
The steps	and ka	votono	oignal	io ou	tout or	ntinuo	ioly Ex	rit the

The stepped keystone signal is output continuously. Exit the Commissioning Function by pressing the button again for 3 seconds or power off.

## ► Mounting, Electrical Connection

The transmitter is mounted on standard 35 mm DIN rail

## Terminal assignments

### LIMITED WARRANTY

DRAGO Automation GmbH hereby warrants that the Product will be free from defects in materials or workmanship for a period of five (5) years from the date of delivery ("Limited Warranty"). This Limited Warranty is limited to repair or replacement at DRAGO's option and is effective only for the first end-user of the Product. This Limited Warranty applies only if the Product:

- 1. is installed according to the instructions furnished by DRAGO;
- 2. is connected to a proper power supply;
- 3. is not misused or abused; and
- there is no evidence of tampering, mishandling, neglect, accidental damage, modification or repair without the approval of DRAGO or damage done to the Product by anyone other than DRAGO.

Delivery conditions are based upon the "GENERAL CONDITIONS FOR THE SUPPLY OF PRODUCTS AND SERVICES OF THE ELECTRICAL AND ELECTRONICS INDUSTRY" recommended by the Zentralverband Elektrotechnik- und Elektronikindustrie (ZVEI) e.V. .

Subject to change!
